WORK EXPERIENCE

Engineering Manager

ion8 • 2024 – Present

Engineering Manager

- Managed the engineering team, and supported team members via pair programming calls and 1:1 sessions.

Full-Stack Software Engineer

- Spearheaded a ground-up rebuild of our flagship product, Call Connector, as the project lead. Reduced development time for new integrations by over 200% and achieved a consistent successful processing rate of 99.7%+.
- Wrote internal and public-facing product and technical API documentation, and contributed to the writing of scientific research grants and technical proposals.
- Architected Nucleus, a private PyPI solution that transformed a fragmented codebase into a maintainable, DRY ecosystem and significantly accelerated middleware app development.

Web Developer and Designer

Grand Living • 2024

- Automated workflows, including building a Salesforce to Eldermark CRM integration that reduced months of manual labor to minutes.
- Developed a swift landing page system, reducing creation time by more than 75%, while upholding brand consistency.
- Achieved 100% reduction in JavaScript and PHP errors.

Manager of Logistics

Brightside Express, LLC • 2021-2023

- Maintained expense sheets, budgeted, and managed trips spanning 100,000+ miles across the United States during the pandemic.
- Decreased annual expenses by \$5000+ with thorough budgeting and negotiating fuel surcharge and detention pay with shippers.

VOLUNTEERING

Developer and Art Lead

Grundo's Cafe • 2023 – Present

- Led the art-development pipeline for Grundo's Cafe. Facilitated cross-team collaboration, authored design specs, and managed the release of new content for a community of 10,000+ players.
- Developed and currently maintain a bespoke suite of administrative tools akin to Jira and Confluence for developer and artist staff.
